

# SpeakPad for professionals

A one-page summary

Communicating with SpeakPad is free, with no time limit, ads or account, so a family can start the day you suggest it. It is built on the principles you would check first, and therapists can ask us for a free year of Pro.

## What families get free

Speaking, sentence building, prediction and every accessibility feature are free, with no time limit. Pro is optional: it saves time for whoever builds and looks after the boards.

## Built the way you would build it

- Words stay where they were learned
- Core words on every board
- Vocabulary that grows in place
- Phrases stay editable
- Switch, touch and VoiceOver access
- Your modeling stays out of their data

## What your service will ask

### Data

SpeakPad has no accounts and collects no data; its App Store privacy label is Data Not Collected. Boards, photos and usage stay on the device. If the device is signed in to iCloud, SpeakPad backs up to that iCloud account, which we can't access. Its only connection to a SpeakPad server downloads a voice a carer chooses, and sends no personal data.

### Agreements

If your service needs a privacy agreement signed or a security questionnaire completed, email [support@speakpadapp.com](mailto:support@speakpadapp.com) and we'll complete it.

### Continuity

SpeakPad runs offline and needs no server of ours to work. Boards print, share as .speakpad files and, with Pro, export as .obz for other AAC apps. Usage data exports as CSV or JSON for free.

### Devices

iPhone and iPad with iOS or iPadOS 17 or later. There is no Android version.

### Languages

English, Spanish, French, Arabic, Portuguese, Hindi, Simplified Chinese, Dutch and Irish, with labels in two languages at once for bilingual families. Apple has no Irish voice, so SpeakPad brings its own.

## Ask for a free year of Pro

If you are a speech and language therapist or pathologist, ask us for a code that gives you twelve months of SpeakPad Pro on your own iPhone or iPad. Email us from your professional address with your name, role, workplace and registration. You redeem the code in the app: in Caregiver Mode, open Settings, tap Unlock SpeakPad Pro and choose Redeem a Code. After the free year, Pro renews at the annual price unless you cancel. [support@speakpadapp.com](mailto:support@speakpadapp.com)

The code is for your own iPhone or iPad, and only for registered therapists. iPads that a practice, clinic or service owns need Pro on each one, at the Pro Annual price, and schools buy licenses through Apple School Manager.

Family handouts in nine languages, and more:
